Dear Mr. Tangherlini,

We met at Wharton last year when you were the guest at "Dinner with Alumni." We discussed the value of bringing skills in operations and logistics from companies like Amazon to government agencies. I applied for Round 3 of Presidential Innovation Fellows (PIF) program yesterday, and I am very excited about getting a chance to use my skills to find efficiencies by integrating goals, strategy, operations, and finance to solve pressing problems facing our country. I also have prior experience working with important federal agencies, such as NASA and I look forward to getting the opportunity to work on a variety of challenges like accelerating the process of bringing National Laboratory-generated technologies (DOE) to the market or enabling Americans to access government services digitally.

As you may remember, I am an engineer by training who made a turn in my career to focus on business after graduating from Wharton. Today, I am an Operations Manager at Amazon and manage a team of more than 250 people at our company's largest shipment center. I also lead budget and planning efforts for my division. I want to put my data analysis and engineering skills to use for the Presidential Innovators' Fellow program. I have attached my resume to this email for your reference. I look forward to hearing from the PIF program.

Sincerely,

(b) (6)

Dan - AWS Worldwide Public Sector will be hosting our 5th Annual AWS Government, Education, and Nonprofits Symposium June 24 - 26, 2014 at the DC Convention Center. We will be bringing together over 2000 people from our Government, Education, and Nonprofit customer and partner ecosystem to network and learn about the latest trends, best practices and ways organizations are driving innovation, savings and efficiencies using the cloud.

(<http://aws.amazon.com/events/wwps/symposia/washington/>)

We would very much like to invite you to give a keynote presentation to set the tone for our two day pay program centered around how cloud enables organizations to deliver more mission for the money. Your passion for accelerating efficiencies and innovation across federal government would add a tremendous amount of value. We'd love to highlight how you are working to advocate change and the ways government can rethink traditional approaches to achieve impact. The session 30 minutes on June 24th. Please let me know if this is something you'd be interested in doing.

We'd love to include you and GSA on the program, We've already secured leaders from NASA, HHS, and expect to have speakers from NJ State Police, Harvard Medical and more. Look forward to hearing back.

Take care - (b) (6)
